

Fire 2008 - From Research into Practice

1-4 September 2008

Adelaide Convention Centre, Australia

In conjunction with the 4th Bushfire CRC Conference and the 15th Annual Conference of the Australasian Fire Authorities Council.

Join us in Adelaide in September 2008 for a stimulating conference, workshop and tour program aimed at exploring the latest developments in fire research and its adoption into practice.

This conference is specifically aimed at researchers, practitioners, professionals and senior managers who need an increased understanding of the state of the art in research and best practice in the areas of wildfire management, urban fire, and wildland urban interface issues.

Topics will include fire suppression, fuels management, ecology and biodiversity, community preparedness and warnings, protection of people and property, and urban fire.

The conference will:

- provide a forum for scientific debate on key research topics important to this area.
- bring together leading experts from academia along

with industry practitioners from around the globe, to share their knowledge in an atmosphere of the shared goals of community safety, and ecological sustainability.

- share understandings and best practice to learn from each other.
- provide a leading networking opportunity to establish and strengthen valuable relationships.
