

ADRI-2, computed in 2024 using the latest data sets, now available.

Australian Disaster Resilience Index: building safer, adaptable communities.

The Australian Disaster Resilience Index is a snapshot of the capacities for disaster resilience in Australian communities. Understanding these capacities, and how they differ from place to place, will help communities, governments and industry work together to cope with and adapt to natural hazards such as bushfires, floods, storms and earthquakes.

Capacity for disaster resilience	Population	Land area
Low	5.9m (23%)	87%
Moderate	13.5m (52%)	10%
High	6.5m (25%)	<2%
