

2013 FIRE WEATHER WORKSHOP

Busselton, W.A.

May 16th, 17th & 18th

Contact: Ralph.Smith@fesa.wa.gov.au

FIRE WEATHER

RESOURCES LIST:

SOURCE	URL	CONTENT	QR-CODE
 2011 Fire Weather & Risk Workshop, Bowral ● ●	http://www.highfirerisk.com.au/fwrw2011/fwrw_home.htm	Go here to read a review of the state of the art for fire weather. Check out the details for the next Workshop in May 2013 in WA!	
Bureau of Meteorology ● ●	http://www.bom.gov.au/	The ultimate source of fire weather knowledge. Your agency will have a Registered User Site for access to even more!	
 HighFire Risk ● ● ●	http://www.highfirerisk.com.au/index.htm	This website provides lots of research output relevant to fires in rugged landscapes. Hosted by ACTESA.	
FIRE – DST (BCRC's Fire impact & Risk Evaluation – Decision Support Tool) ● ●	http://www.bushfirecrc.com/projects/2-1/risk-assessment-decision-toolbox (see the linked resources as well)	This is a far-reaching risk assessment tool. As such it relies on quality fire weather data and models.	
 Centre for Australian Weather & Climate Research (CAWCR) ● ●	http://www.cawcr.gov.au/publications.php	This site has lots of downloadable technical publications, written by the experts from BoM and CSIRO.	
Australian Meteorological and Oceanographic Journal (AMOJ) ● ●	http://www.bom.gov.au/amm/	AMOJ evolved from the Australian Meteorological Magazine. It has some good articles. Go into the Index and search "fire".	
 AFAC's Knowledge Web ●	http://knowledgeweb.afac.com.au/research/fire_behaviour/weather	If you are a member, there is good fire weather material on-line. If not see your agency.	
Bushfire Cooperative Research Centre ● ●	http://www.bushfirecrc.com/category/bushfiretopic/fire-weather	There are a lot of resources of different types here. Take the time to browse, and keep up to speed with the research agenda.	

If you have a QR-Code reader on your mobile device you can scan the QR-codes and see the websites.

To help you find what you need, the following symbols are used: ● = scientific; ● = technical; ● = operational
